

Gold Coast Light Rail Stage 2 Start of early works

Commencing on Monday 18 April 2016, GoldlinQ's preferred tenderer CPB Contractors will commence early works in preparation for the construction of the Gold Coast Light Rail Stage 2. This work is expected to take up to three weeks to complete, weather permitting.

Early works will include site investigations along the Smith Street Motorway, pedestrian and cycle path between Napper Road and Olsen Avenue and in the vicinity of Biggera and Coombabah Creeks.

Works will include:

- Geotechnical investigations such as potholing and test pits
- Use of machinery such as trucks, excavators, back-hoe and utility mounted drill rig
- Delivery and unloading of materials
- Minor vegetation clearing if required to access sections of the project alignment
- Pedestrian access will be maintained however some changes to pedestrian routes may occur during these works.

Work vehicles will be entering the site via Olsen Avenue (opposite Griffith University Campus), Uplands Drive, Napper Road and Smith Street Motorway.

Works will be undertaken between 7.00am and 6:00pm, Monday to Saturday. Workers may arrive onsite between 6.00am and 7.00am to prepare for the day's activities.

During these early works, you may notice some changes around your local area such as construction vehicles, traffic management signs and personnel.

Every effort will be made to keep disruption to a minimum for residents and businesses in close proximity to the project site. We appreciate your patience during these important works and will continue to update you as work progresses.

These early works and investigations will allow detailed design to continue and additional information sessions and other communications activities will occur prior to major construction commencing as scheduled later in the year.
